

## **EXPERT WITNESS**

### ***Expert Witness Work***

Dr. Brian C. Smith of Spectros Associates is earning a growing reputation as an expert in the application of infrared spectroscopy to Forensic Science. As a result of his work with numerous police and crime labs, he is well equipped to help prosecutors and defense attorneys examine forensic chemical analyses, and determine if proper procedures were followed and whether the results are accurate.

Dr. Smith also has experience as an expert witness in patent infringement cases. In any case where chemical analysis, particularly infrared spectroscopy, is used he can assist in analyzing methods used, determine the correctness of data interpretations, and in de-bunking the theories of opposing counsel.

Dr. Smith has experience writing expert reports, giving depositions, and testifying at trials up to the Federal District Court level. He has been complimented on his calm demeanor in court, and on his ability to clearly explain complex technical subjects to judges and laypeople.
